

Dusk Effect Prompt

Image Model: Nano Banana Pro

Prompt :

Ultra-realistic clouds at dusk, with no visible sun, just a natural sky gradient from golden yellow and soft orange on the horizon to pink, lavender, and deep blue overhead. Keep the sky about 20% darker while keeping the people and foreground well-lit with natural lighting and details. Add soft atmospheric haze, cinematic HDR, smooth tonal transitions, rich natural green tones, subtle blooms, DSLR quality, premium landscape photography, 8K, photorealistic, natural look without AI.
